

Coronavirus Protocol 03/16/2020

On behalf of Drs. Zanchi and Martinez they would like to assure the PSTB staff that we have the proper equipment and supplies to safely see patients and protect the staff following the protocol set forth below:

1. Patient will be screened prior to entering the building, patient will be given a questionnaire and have a temperature check as per the screening guidelines of the CDC.
 - a. If patient has a fever of 99.6 and above or is suspected of Coronavirus, patient will be directed to the nearest testing facility or Urgent Care Center (Baycare, Advent Health)
 - b. If no fever present, patient will proceed into building for appointment. Patient Temperature is to be documented on the questionnaire
 - c. If patient is coughing they will be given a mask
2. Triage will consist of BP, P, O2, ESS and weight only.
3. Exam rooms will be disinfected using Super Sani-Cloths Germicidal Disposable Wipes and McKesson Pro-Tech Citrus Disinfectant Spray, after each patient appointment. If patient is suspected of COVID-19, room will be taken out of service, remain closed, as per duration described per CDC guidelines.
4. Sleep staff will follow same protocol as clinic
5. Scheduled patients will be prescreened via telephone prior to their appointments
6. Sleep schedulers will call each patient, screen for COVID-19 and document in the chart via telephone encounter.
7. Patients will receive text and voice messages with Coronavirus screening information.
8. Brandon Allergy Clinic will be conducted in the back part of the office (Sleep entrance side), after prescreening and checked in.
9. There will be a daily temperature and symptom check of the PSTB staff
10. Mandatory reading of supplied OSHA's COVID-19 Control and Prevention Guidelines.
